

TRIPTI MISHRA

Data Analyst | BI Developer

Delhi, India • tripti.m2026@gmail.com • (+91) 8130361306 • linkedin.com/in/tripti-mishra-4a68881ba • github.com/Tripti-m-ishra

PROFILE SUMMARY

Data Analyst with **3+ years** of hands-on experience developing **Power BI dashboards and reports**, writing **SQL** for data extraction, transformation, and validation, and using **Python** for analysis on enterprise-scale datasets (**5,000+ suppliers/brands, 100,000+ records**). Skilled in translating business requirements into scalable data models, dashboards, and reporting solutions, with strong analytical thinking and a track record of collaborating directly with cross-functional and business stakeholders. Foundational exposure to machine learning concepts through certification, with a strong track record of quickly learning new BI and analytics platforms.

TECHNICAL SKILLS

BI & Visualization: Power BI (Dashboard & Report Development), DAX, Power Query, Data Visualization, KPI Reporting

Programming & Querying: SQL (Extraction, Transformation, Validation), Python (Pandas, NumPy)

Data & Analytics: Data Cleaning, Exploratory Data Analysis (EDA), ETL, Data Modeling, Statistical Analysis, Data Storytelling, Data Validation & QA

Databases: MySQL, Snowflake (Basic)

Tools & Collaboration: Excel (Advanced), Git, GitHub, Jira, VS Code, Stakeholder Requirement Gathering

ML & AI Foundations: Generative AI Fundamentals, Responsible AI, Prompt Engineering (certified) — building toward applied ML and Looker

PROFESSIONAL EXPERIENCE

Data Analyst | Droisys India Pvt. Ltd.

March 2023 – April 2026 | Noida, India

- Worked on enterprise-scale **product intelligence datasets** covering **5,000+ suppliers and brands** and **100,000+ product records** used in AI-driven product recognition systems.
- Extracted, cleaned, transformed, and validated structured and unstructured data using **SQL and Python**, improving dataset accuracy by **22%** for downstream analytics and machine learning applications.
- Performed large-scale **brand verification, product mapping, and duplicate identification** across **10,000+ records**, reducing data inconsistencies by **18%**.
- Automated repetitive data preparation and validation** workflows using Python and Excel, cutting manual processing time by **35%**.
- Reviewed and validated **1,000+ annotated data samples**, applying rigorous **QA and troubleshooting** to ensure accuracy and reliability of analytical deliverables.
- Collaborated directly with **business stakeholders and cross-functional teams** to translate requirements into **data models, dashboards, and reporting solutions**.
- Conducted **exploratory data analysis** across **50+ datasets** using SQL and Python to identify trends, patterns, and anomalies, enabling faster business decisions.
- Built and continuously improved **10+ Power BI dashboards and KPI reports**, using **DAX and Power Query** for data modeling and **Excel** for ad-hoc validation, optimized for usability and performance.
- Supported ETL and data modeling for **20+ pipelines** using **SQL and Python**; participated in Agile delivery (**60+ sprints**) using Jira and Git.

Data Analyst Intern | DecodeLabs

May 2026 – June 2026

- Performed data cleaning, preprocessing, and exploratory analysis on **15+ datasets** using SQL and Python to support business reporting.
- Built **5+ SQL queries and Power BI dashboards**, cross-checked in **Excel**, for reporting and visualization of key business metrics.
- Applied statistical analysis in **Python** and data validation techniques, improving report accuracy by **12%** to support data-driven decision-making.

PROJECTS

- Product Intelligence Analytics Platform** — Analyzed **50,000+ product records** using **SQL and Python**; built **6+ Power BI dashboards** with DAX, and used **Excel** for validation checks; improved reporting efficiency by **25%** through automation. Tech: SQL, Python, Power BI, Excel.
- HR Analytics Dashboard** — Queried and cleaned employee data (**500+ records**) using **SQL and Python**; built an interactive **Power BI** dashboard with DAX measures and **Excel**-based Power Query for ETL to analyze attrition and workforce KPIs. Tech: SQL, Python, Power BI, DAX, Excel.
- Sales Performance Analysis** — Wrote optimized **SQL** queries analyzing **10,000+ transactions**; used **Python (Pandas)** for trend analysis and built a **Power BI/Excel** reporting layer for revenue, product, and regional trends. Tech: SQL, Python, Power BI, Excel, MySQL.
- Customer Behavior Analysis** — Queried customer data with **SQL**, conducted EDA in **Python (Pandas, NumPy)** on **8,000+ customer records**, and built summary visualizations in **Power BI and Excel** to identify purchasing patterns. Tech: SQL, Python, Power BI, Excel.

EDUCATION

Master of Computer Application (MCA) — University of Delhi (2025 – 2027)

Bachelor of Commerce (B.Com) — University of Delhi (2016 – 2019)

ACHIEVEMENTS & CERTIFICATIONS

- Quarter Star Performer** for improving data quality and process efficiency. Certifications: Data Analytics Program (Simplilearn), IBM AI Fundamentals, Claude 101 (Anthropic).
